

# PRAXIS COMPUTING MEMBERSHIP SYSTEM

Cutting edge membership system

## ABOUT FELLO

Our membership system, Fello is a cutting-edge solution designed to streamline and secure the management of memberships for organisations of all sizes. Built on a foundation of .NET Core API, Angular frontend, and backed by a SQL Server database, it embodies modern technology for unparalleled performance and reliability. Security is paramount, with robust encryption protocols ensuring the safety of sensitive member data. Integration with Sage further enhances its capabilities, enabling seamless billing and reporting. Whether it's handling member registrations, renewals, or comprehensive reporting, Fello stands as a pinnacle of efficiency and security in membership management. Fello can be procured as full system or as a customised module based implementation.
